

Ensemble Security Operations Platform w/ Google SecOps

legato security

OVERVIEW

Legato Security's Security Operations Platform, Ensemble, seamlessly integrates Google SecOps to increase visibility, reduce complexity, and increase the operational efficiency of your security team along with the security tools within your environment. Ensemble empowers organizations with heightened visibility, simplified alert management, real-time reporting, asset intelligence, and swift data correlation between SecOps and additional security tools. As businesses grapple with the complexities of the security landscape, Ensemble and Google SecOps emerge to provide a unified approach to security operations, transforming how organizations safeguard their assets against evolving threats.

PRODUCT FEATURES

Scale Infinitely: Analyze any volume of telemetry with a solution built on the same infrastructure that powers Google's core services.

Simplified Alert Management: Ensemble reduces complexities associated with managing alerts. Through intelligent correlation, redundant and false alerts are minimized, allowing security teams to focus on genuine threats and respond promptly.

Real-Time Reporting: Pull executive-level reporting instantly. Immediate reporting capabilities give organizations insight into their security posture in real-time, helping drive strategic and data-driven decisions.

Asset Intelligence: Ensemble provides advanced asset intelligence, offering a faster and simpler way to detect and secure every endpoint on the network.

DRIVING INNOVATION

>> COST SAVINGS

Streamlined alert management and increased visibility contribute to cost savings. By minimizing false positives and optimizing resource allocation, businesses can enhance operational efficiency and reduce unnecessary expenses.

>> ENHANCED COMPLIANCE MANAGEMENT

Ensemble's asset intelligence ensures that security measures align with regulatory requirements, mitigating compliance-related risks.

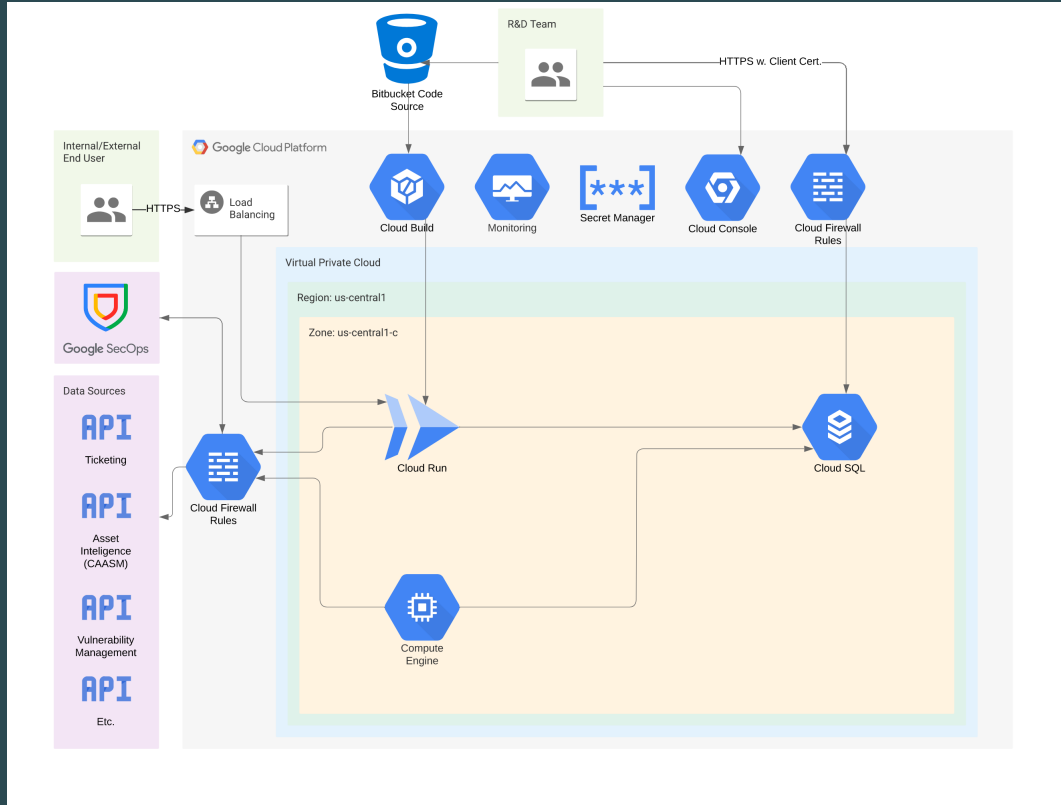

>> STRATEGIC DECISION-MAKING

Real-time reporting empowers organizations to make informed and strategic security decisions. This leads to a more proactive and resilient security posture, safeguarding critical assets and data.

>> EFFECTIVE INCIDENT RESPONSE

Ensemble's real-time data correlation accelerates the detection and mitigation of security incidents.

HOW IT WORKS

Google SecOps retains, analyzes, and searches organizations security telemetry. It alerts on suspicious activity, detects threats, and helps analysts understand the cause of those threats. Ensemble provides visibility into SecOps results, reports on SecOps outcomes, and correlates SecOps results with existing tickets, asset data, and other key information to give customers view into their complete security posture.

WHY LEGATO SECURITY?

Industry Expertise

Legato Security's analysts have decades of experience with organizations of all sizes and in different industries. From small to medium businesses to Fortune-sized enterprises, Legato Security has a reputation for providing targeted security solutions custom-built for each use case. Legato Security's advisors help organizations identify current gaps and vulnerabilities, then plan and implement a strategy built for industry-specific threats.

Customer-Centric Approach

Meeting a customer's needs is priority number one. Legato Security will work closely with each customer to ensure a clear line of visibility and communication that meets the needs and requirements of each organization.

Cost Savings

By partnering with Legato Security, organizations can optimize their security investment. Our scalable solutions allow businesses to pay for only the services they need, reducing unnecessary expenses associated with managing and maintaining an in-house security infrastructure.
